Active learning.

Self-learning.

Problem Solving.

Video Editing.

C++ basic.

HTML/CSS basic.

HOBBIES

Philosophical Research.

Listen Drill Music Songs.

Reading books.

EDUCATION

FPT University Ho Chi Minh City.

Software Engineering.

INTRODUCE

I am Long. I heard about you when my friends mentioned that the F-Code Club is an academic club focused on coding. F-Code has hosted some talk shows and games that make me interested. Currently, I am leading a team of five people, and I have experience in task delegation and problem-solving. Additionally, I have been a part of an event organization team, specializing in audio-visual systems, for five years. Consequently, I believe I can contribute to F-Code Club's events. I am eager to join the academic team to enhance my major.

GOAL

2024

- Complete basic knowledge about computer and networking.
- Master basic C/C++ and Java knowledge.

2025

- Master front-end web development including HTML/CSS/JavaScript other frameworks knowledge.
- Know about UX/UI and use Figma to design web UI.
- Know and use back-end for website.

2026

- Create website product to serve F-Code club management.
- Complete to built products from university homework or group projects.

2027
